ChargeGuard Simple Access Control for HCS Series

The ChargeGuard Access Control Option is an affordable, key-based access control solution designed for fleet, workplace, multi-tenant, hospitality and residential charging applications.

Note: HCS models with ChargeGuard are built to order and have a standard lead time of 1-2 weeks.

Cable Cradle, EV Charging Station Cable Holder, Wall Mount

The ClipperCreek Cable Cradle mounts to a wall near your electric vehicle charging station or connector holster to easily manage the cable, keeping it off the ground and wall when not in use.

SAE J1772 EV Charging Station Connector Holster, Wall Mount

This wall or pedestal mount SAE J1772 connector holster provides excellent protection from the elements. Simple to install and durable.

Retractor for Charging Cables, Wall Mount

The Wall Mount Retractor from ClipperCreek is the ideal solution for sites that need cable management and pairs well with any ClipperCreek wall mounted charging station. Extension Kits are available for pedestal mounted charging stations.

CP-50 EVSE Tester

The CP-50 Compact EVSE Tester from ClipperCreek is the perfect tool for installers to test a Level 1 or Level 2 EVSE (SAE J1772 connectors only) installation without a vehicle present. The CP-50 can function as a stand-alone device or in combination with a DVM (Digital Volt Meter) and/or oscilloscope to verify operations and troubleshoot an EVSE. The CP-50 is designed for use with ClipperCreek EVSEs, and is compatible with most other makes and models of SAE J1772 EVSEs on the market.

SAE J1772 Combination Lock

This combination lock provides an easy way to lock the connector head of any ClipperCreek charging station with the lockable SAE J1772 connector. Prevent unwanted use of the charging station by locking into the Connector Holster or prevent interrupted use by locking the connector head into the vehicle's inlet.

HCS Travel Bracket

Mount a plug-in HCS charging station to this stainless steel bracket and easily remove for travel or moving. Consider a bundle of two if there is a need to mount the HCS at a secondary location. No need for tools to remove or re-mount the station.

Note: Charging Stations and Accessories sold separately.
